Cross Sectional View of 1" Open Individual Louver Construction

(See Louver Slat Moldings #1051, #1245 & #1282 in our Spec Catalog.)

- Available in $\frac{3}{4}$ ", 1", $\frac{1}{4}$ " and $1\frac{1}{2}$ " Thicknesses.
- Top and Bottom Rails may need to be adjusted in size to accommodate full louver placement within an opening. Non-standard part charges do not apply in this case.
- The spacing from louver to louver is $\frac{3}{32}$ " or 2.50mm. (The spacing at the top and bottom varies with the size of the louver.)
- Available for door styles in Frame Groups **A1** or **A2** with 1", $1\frac{1}{2}$ " or 2" fixed louvers installed in the **SR100** stile and rail profile.
- To order double panel doors, please specify which section you prefer to have the louvers installed, these are available in the top section, bottom section or both.
- Double panel door styles can be ordered with a 50/50 or 60/40 split. If you prefer a custom center rail placement, please specify the dimension from the top of the door to the top of the center rail.
- Minimum door size is $6\frac{5}{8}$ "x6" for single panel doors and $6\frac{5}{8}$ "x11" for double panels.
- Operable Open Louvered Doors are also available. Inquiries can be faxed or emailed to our Non-Catalog Team.

Louvered Doors

"Use our design options to create unique looks."

Closed Louver and Beaded Applied Moldings

- Interlocking Louvered & Beaded Applied Moldings are designed to be affixed to a $\frac{1}{4}$ " ply or a veneered panel, to simulate *open* louvers.
- These moldings are cut to fit and you may end up with a partial louver or bead on the center panel.
- Louvered moldings are available in 8' lengths or you may order your doors with these applied moldings affixed to the center panel using **SR100** for your stile and rail profile.
- These interlocking moldings are drawn full scale.
