

Decorative Inserts

"Ordering from WalzCraft is easy!"

Decorative Inserts may be ordered in a different wood species than the door or drawer front. Please specify the wood specie of the insert you wish to order. *Inserts are not available in Rustic Grades.* Most inserts will have a vertical grain direction and are not visible on the back of a door or drawer front. ***Decorative inserts are only available installed in a door, drawer front or face frame.*** When ordering face frames with decorative inserts, the placement of the inserts may vary due to plow grooves (if applicable) and pocket screw locations. *If ordering inserts on face frames, doors and drawer fronts, approval drawings may be required prior to manufacturing your order.* For Stile and Rail and Outside Edge Profile options available with pegs, refer to the compatibility charts on our *Web Site*.

Butterfly Insert

Horizontal Grain

- The Butterfly Insert is a unique decoration for use in solid wood panel doors.
- Center Panel Face Routing can be added through or behind the Butterfly Insert for additional detailing.
- Standard grain direction on a Butterfly Insert is **horizontal**.

For further assistance with this option, please contact our Non-Catalog Team.
