

Wine Racks

"WalzCraft is a Premier Leader in the Industry for Manufacturing Custom Products!"

Wine Rack Lattice

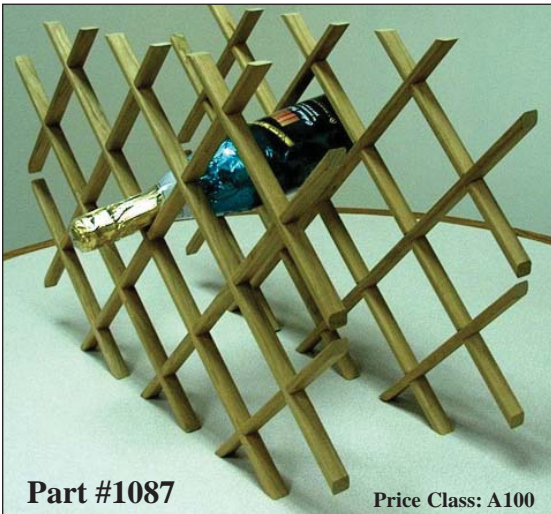

WalzCraft offers assembled **Wine Rack Lattice** *with* or *without* a frame in all of the wood species and grades shown in our Specification Catalog. Wine rack lattice is sold by the square foot and you may order it made to the exact size that your project requires. Maximum size, *which varies with the wood specie chosen*, is 96" x 96". The photos below show typical wine racks where the front and back sections are both 24" wide x 16" high. Attachment to your cabinetry can be accomplished by simply pin nailing into place, or by using wood blocks. **Please note that if doing an installation similar to the photos, you must order two pieces.**

- The openings in the wine rack lattice measure 4" x 4".
- Wine rack lattice is cut and assembled from molding #893.
- The minimum size for pricing is **1 square foot** per piece.
- To calculate finishing charges, determine the total square footage in your assembled wine rack lattice using the outside dimensions and add the 2 sided multiplier for finished pricing.

Molding #893 is available in 8' lengths for you to customize your own notching patterns. The part number for the 8' molding that frames an assembled wine rack is #1633. Orders for an assembled wine rack lattice *with* a frame will be processed by our Non-Catalog Team.

#893
PC: M03

#1633
PC: M10

Part #1087

Price Class: A100

Assembled wine rack *without* a frame. Minimum size is 9"x9".

Part #1736

Price Class: A102

Assembled wine rack *with* a frame. Minimum size is 10⁷/₁₆"x10⁷/₁₆".

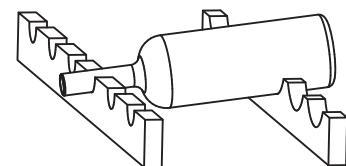

Wine Rack Shelf

Wine Rack Shelves are sold by the square foot and can be manufactured in widths from 5½" to 96" and heights from 2" to 6". There is a front and a back piece to these components, which allows the bottles to tip forward, so they *must* be ordered as a pair.

- Bottle openings are spaced 4¼", center to center.
- The number of openings per shelf will be determined by your specified width.
- **D7** is the standard outside edge.
- The minimum size for pricing is **1 square foot** per piece, using **Price Class A101**.
- To calculate finishing charges, determine the total square footage of each section and use the multiplier for the 2 sided finishing price.
- Not available in RTF.

Part #WR200

This three dimensional view shows that the bottles tilt forward when placed in the shelves.
