## Simulated Distressing Options

★ Simulated Distressing Options are priced per option, by the Square Foot. ★

### Simulated Distressing Options

<i>Screw Impressions</i>	<i>Light - SD10</i>	<i>Heavy - SD11</i>
<i>Nail Impressions</i>	<i>Light - SD20</i>	<i>Heavy - SD21</i>
<i>Wear Marks</i>	<i>Light - SD30</i>	<i>Heavy - SD31</i>
<i>Nicks</i>	<i>Light - SD40</i>	<i>Heavy - SD41</i>
<i>Wormholes</i>	<i>Light - SD50</i>	<i>Heavy - SD51</i>
<i>Cracks</i>	<i>Light - SD60</i>	<i>Heavy - SD61</i>
<i>Rasp Marks</i>	<i>Light - SD70</i>	<i>Heavy - SD71</i>

Simulated Distressing Options are randomly placed on the face of the product giving an aged appearance. Choose between a **Light or Heavy pattern**. All options are available on solid wood slab and raised panel doors, flat panel doors and moldings. (Note, the pattern can be varied between options.) 1/8", 1/4", 1/2", 5/8" or 3/4" plywood panels are **not available with wear marks**.

**Wear Marks are the only Simulated Distressing option available on products made with MDF. This material has a tendency to fracture.**

Selecting a Glaze to compliment your finish will enhance the distressed detail. The Flow Pen glaze application is not an option with Simulated Distressing. We suggest ordering a sample, prior to placing your order.

## Renaissance Distressing

★ Add: Upcharge per Square Foot for the Renaissance Distressing "Look" ★

Renaissance Distressing is a "Look" that gives an aged or antique appearance to solid wood components.

\* When ordering Renaissance Distressing you are choosing the "Look" as an entire package, which includes all of the distressing patterns featured in the illustration to the right. These options are not selected individually, contrary to the way that we order Simulated Distressing.

This **heavily distressed "Look"** is **much more pronounced** than Simulated Distressing, and is also randomly placed on the face of the product. This "Look" is achieved using tools such as an orbital sander, chisel, putty knife, razor, rasp, claw and hammer.

When ordering Renaissance Distressing it is our recommendation that you use one of the following wood species: Alder, Butternut, Cherry, Pine, Quarter Sawn Red or White Oak, Red Oak, Walnut and White Oak. **Renaissance Distressing is not an option with veneered flat panels, plywood panels and some moldings.**

\* **We highly recommend that a sample be ordered for your approval prior to placing an order.**
