

# “French Mitered” Mortise & Tenon Doors

## French Miter Benefits

The **French Miter** door construction was introduced in an effort to be a more cost effective alternative to an applied molding door. However, the **French Miter** door has other advantages, as well. It provides more structural integrity than an applied molding door because the molding detail is an integral part of the stiles and rails instead of a separate piece. It provides a more traditional look than a formal mitered door while still having the applied molding look. There are more outside edge profile options available than with a mitered door, and you have the flexibility to vary your stile and rail widths.

### Drawer Front Style 10FM\*

Shown with: MP604-76, Flat Panel and D79 Outside Edge  
(3" Wide Stiles, 2 1/4" Reduced Rails)

### Door Style 10FM

Shown with: MP604-76, PR302-38 and D79 Outside  
(3" Wide Stiles & Rails)

## French Mitered Door Notes

1)	Door Styles	Available in all of the same door styles as the raised and flat panel mitered doors. Simply add an “FM” to the style number. (ie: <b>Style 10FM</b> )
2)	Stile & Rail Profiles	French Mitered doors are available with many of our 600 Series Mitered Profiles. Any 600 series profile number that has a corresponding <b>FM</b> symbol is available for a French Miter door.
3)	Stile & Rail Widths	Standard stile and rail width is determined by the French Miter profile number. A door with the <b>MP604-76</b> profile will have 3" wide stiles and rails (76mm = 3").
		Modification of stile and rail widths is allowed. French Miter construction gives you the flexibility to vary your stile and rail widths.
		Please indicate the non-standard part sizes in the <b>Special Instructions</b> column on your order forms. All Non-Standard Part Size restrictions apply, see <b>General Information</b> section of catalog.
4)	Outside Edge Profiles	Available with all Outside Edge Profiles.
5)	Door Widths / Heights	The maximum width or height can not exceed 96".
6)	Pricing	French Mitered doors are priced using the Mitered door pricing <b>plus 15%</b> .
7)	Thickness	French Mitered doors & drawer fronts are available in 3/4" and 1" thicknesses. <b>Add 30% for 1" thickness.</b>
