

Reconstituted Veneer

"Ask about our Custom Finishing Program."

Reconstituted Veneer / Architectural Grades

Architectural Grade / Reconstituted Veneer is a man-made product using a fast growing tropical wood species, often times *Obeche*. The veneers are dyed to mimic the look of that particular specie. The veneer sheets are made by laminating a block of veneers together. The block is then sliced so that the edges of the laminated veneer become the "grain" of the Reconstituted Veneer. The grain is very straight. This veneer has outstanding color and grain consistency from sheet to sheet. Sheets are largely defect-free, making them a great option for projects where consistency is critical! These veneers are intended for a more contemporary look and are an excellent product when wanting a continuous grain match. Suitable for Natural/Clear Coat (*no stain*) and light stain colors. **We recommend that you view a sample on our website at WalzCraft.com, click on the Resources tab, or order a sample for your own use.**
